AMENDMENTS TO THE CLAIMS

Please add or amend the claims to read as follows, and cancel without prejudice or disclaimer to resubmission in a divisional or continuation application claims indicated as cancelled:

1. (*Original*) A metabolite of a selective androgen receptor modulator (SARM) compound, wherein said SARM is represented by the structure of formula I:

wherein G is O or S;

X is O;

T is OH, OR, -NHCOCH_3 , or NHCOR ;

Z is NO_2 , CN, COOH, COR, NHCOR or CONHR ;

Y is CF_3 , F, I, Br, Cl, CN, CR_3 or SnR_3 ;

Q is acetamido or trifluoroacetamido;

R is alkyl, haloalkyl, dihaloalkyl, trihaloalkyl, CH_2F , CHF_2 , CF_3 , CF_2CF_3 , aryl, phenyl, F, Cl, Br, I, alkenyl or OH;

and R1 is CH_3 , CH_2F , CHF_2 , CF_3 , CH_2CH_3 , or CF_2CF_3 .

2. (*Original*) The selective androgen receptor modulator metabolite of claim 1, wherein G is O.
3. (*Original*) The selective androgen receptor modulator metabolite of claim 1, wherein T is OH.

4. *(Original)* The selective androgen receptor modulator metabolite of claim 1, wherein R1 is CH₃.
5. *(Original)* The selective androgen receptor modulator metabolite of claim 1, wherein Z is CN.
6. *(Original)* The selective androgen receptor modulator metabolite of claim 1, wherein Y is CF₃.
7. *(Original)* The selective androgen receptor modulator metabolite of claim 1, wherein Q is in the para position.
8. *(Original)* The selective androgen receptor modulator metabolite of claim 1, wherein Z is in the para position.
9. *(Original)* The selective androgen receptor modulator metabolite of claim 1, wherein Y is in the meta position.
10. *(Original)* The selective androgen receptor modulator metabolite of claim 1, wherein said metabolite is an androgen receptor agonist.
11. *(Original)* The selective androgen receptor modulator metabolite of claim 1, wherein said metabolite is an androgen receptor antagonist.
12. *(Original)* The selective androgen receptor modulator metabolite of claim 1, wherein said SARM is represented by the structure of formula II:

II

13. *(Original)* The selective androgen receptor modulator metabolite of claim 1, wherein said SARM is represented by the structure of formula VII:

wherein NR_2 is NO, NHOH, NHOSO_3 , or NHO-glucoronide.

16. (Original) The selective androgen receptor modulator metabolite of claim 1, wherein said SARM is represented by the structure of formula VIII:

17. (Original) The selective androgen receptor modulator metabolite of claim 16, wherein said metabolite is represented by the structure:

18. (Original) The selective androgen receptor modulator metabolite of claim 1, wherein said metabolite is a hydroxylated derivative of the SARM compound of formula I.

19. (Original) The selective androgen receptor modulator metabolite of claim 18, wherein said metabolite is represented by the structure:

20. (Original) The selective androgen receptor modulator metabolite of claim 18, wherein said metabolite is represented by the structure:

21. (Original) The selective androgen receptor modulator metabolite of claim 1, wherein said metabolite is an O-glucoronide derivative of the SARM compound of formula I.

22. (Original) The selective androgen receptor modulator metabolite of claim 21, wherein said metabolite is represented by the structure:

23. (Original) The selective androgen receptor modulator metabolite of claim 21, wherein said metabolite is represented by the structure:

24. (Original) The selective androgen receptor modulator metabolite of claim 1, wherein said metabolite is a methylated derivative of the SARM compound of formula I.

25. (Original) The selective androgen receptor modulator metabolite of claim 1, wherein said SARM is represented by the structure of formula III:

III

26. (Original) The selective androgen receptor modulator metabolite of claim 25, wherein said metabolite is represented by the structure:

wherein said metabolite is represented by the structure:

32. *(Original)* The selective androgen receptor modulator metabolite of claim 27, wherein said metabolite is an O-glucuronide derivative of the SARM compound of formula I.

33. *(Withdrawn)* The selective androgen receptor modulator metabolite of claim 32, wherein said metabolite is represented by the structure:

34. *(Withdrawn)* The selective androgen receptor modulator metabolite of claim 32, wherein said metabolite is represented by the structure:

35. *(Original)* The selective androgen receptor modulator metabolite of claim 27, wherein said metabolite is a methylated derivative of the SARM compound of formula IV.

36. *(Original)* A composition comprising the selective androgen receptor modulator metabolite of claim 1; and a suitable carrier or diluent.

37. *(Original)* A pharmaceutical composition comprising an effective amount of the selective androgen receptor modulator metabolite of claim 1; and a pharmaceutically acceptable carrier or diluent.

38. *(Withdrawn)* A method of binding a selective androgen receptor modulator compound to an androgen receptor, comprising the step of contacting the androgen receptor with the selective androgen receptor modulator metabolite of claim 1, in an amount effective to bind the selective androgen receptor modulator metabolite to the androgen receptor.

39. *(Withdrawn)* A method of suppressing spermatogenesis in a subject comprising contacting an androgen receptor of the subject with the selective androgen receptor modulator metabolite of claim 1, in an amount effective to suppress sperm production.

40. *(Withdrawn)* A method of contraception in a male subject, comprising the step of administering to said subject the selective androgen receptor modulator metabolite of claim 1, in an amount effective to suppress sperm production in said subject, thereby effecting contraception in said subject.

41. *(Withdrawn)* A method of hormone therapy comprising the step of contacting an androgen receptor of a subject with the selective androgen receptor modulator metabolite of claim 1, in an amount effective to effect a change in an androgen-dependent condition.

42. *(Withdrawn)* A method of hormone replacement therapy comprising the step of contacting an androgen receptor of a subject with the selective androgen receptor modulator metabolite of claim 1, in an amount effective to effect a change in an androgen-dependent condition.

43. *(Withdrawn)* A method of treating a subject having a hormone related condition, comprising the step of administering to said subject the selective androgen receptor modulator metabolite of claim 1, in an amount effective to effect a change in an androgen-dependent condition.

44. *(Withdrawn)* A method of treating a subject suffering from prostate cancer, comprising the step of administering to said subject the selective androgen receptor modulator metabolite of claim 1, in an amount effective to treat prostate cancer in said subject.

45. *(Withdrawn)* A method of preventing prostate cancer in a subject, comprising the step of administering to said subject the selective androgen receptor modulator produg of claim 1, in an amount effective to prevent prostate cancer in said subject.
46. *(Withdrawn)* A method of delaying the progression of prostate cancer in a subject suffering from prostate cancer, comprising the step of administering to said subject the selective androgen receptor modulator metabolite of claim 1, in an amount effective to delay the progression of prostate cancer in said subject.
47. *(Withdrawn)* A method of preventing the recurrence of prostate cancer in a subject suffering from prostate cancer, comprising the step of administering to said subject the selective androgen receptor modulator metabolite of claim 1, in an amount effective to prevent the recurrence of prostate cancer in said subject.
48. *(Withdrawn)* A method of treating the recurrence of prostate cancer in a subject suffering from prostate cancer, comprising the step of administering to said subject the selective androgen receptor modulator metabolite of claim 1, in an amount effective to treat the recurrence of prostate cancer in said subject.
49. *(Withdrawn)* A method of treating a dry eye condition in a subject suffering from dry eyes, comprising the step of administering to said subject the selective androgen receptor modulator metabolite of claim 1, in an amount effective to treat dry eyes in said subject.
50. *(Withdrawn)* A method of preventing a dry eye condition in a subject, comprising the step of administering to said subject the selective androgen receptor modulator metabolite of claim 1, in an amount effective to prevent dry eyes in said subject.
51. *(Withdrawn)* A method of inducing apoptosis in a cancer cell, comprising the step of contacting said cell with the selective androgen receptor modulator metabolite of claim 1, in an amount effective to induce apoptosis in said cancer cell.
52. *(Original)* A metabolite of a selective androgen receptor modulator (SARM) compound, wherein said SARM compound is represented by the structure of formula II:
